COMPANY

New Energy Scout GmbH is a Swiss-based SME managed by engineers located in Winterthur, Switzerland.

Our main business area:

Renewable energies, in particular wind energy, solar energy and biogas projects.

Our guiding principle/our philosophy:

All our services are targeted at a resource saving and environmentally friendly energy supply. We are committed to social, economic and ecological sustainability.

We are successfully active in Switzerland and abroad since 2005. The company is owned by founders and several employees.

OUR SERVICES

We are your experts for renewable energies:

- Consulting, Due Diligence
- Market studies, concepts
- Presentations, trainings and excursions

Our core areas:

Wind energy **Photovoltaic** **Biogas**

We offer project management, owner's engineering, expertises and consultancy throughout all stages of the project: from the planning to technical aspects and through to questions regarding efficiency or approval procedures.

Markets: Switzerland and worldwide, with emphasis on Europe.

RENEWABLE ENERGIES

Consulting, Due Diligence

New Energy Scout advises you on questions concerning renewable energies. Our advisory expertise covers the entire project cycle, including the areas of planning, technology, profitability or approval procedures.

We are evaluating projects (due diligence) at all stages.

Market studies, concepts

New Energy Scout develops energy concepts and prepares comprehensive market studies.

With proven methods, we directly search for the best sites and projects in your target market.

For bulk consumers, like industrial productions we develop concepts and strategies to establish renewable energy sources becoming part of their power supply.

Presentations, trainings and excursions

New Energy Scout offers customized trainings and workshops. Our presentations give your participants important impulses.

We also organize and guide excursions to wind energy, photovoltaic and biogas plants. Our experts explain the major steps during planning, construction and operation.

WIND ENERGY

New Energy Scout manages your project from the idea to commissioning and to management. Depending on your requirements, we also take care of individual tasks.

This includes wind measurements, technical planning, various reports/opinions as well as overall project management and consulting.

As we are operating on the market since 2005, we have become a branch expert with profound expertise in projects in complex terrain.

Our service range:

- Feasibility and owner's engineering
- Project management, supervision of tenders, technical planning
- Identification of projects, Due Diligence
- Spatial planning, search area method (GIS)
- Approval procedure
- Wind study and wind measurement (bankable and in line with international standards)
- Environmental Impact Study (EIS) incl. noise and shadow impact assessments (according to DIN ISO 9613-2 and intern. norms)
- Photo montages and visualisations
- Construction supervision
- Studies

As one of the leading companies in the Swiss market, we regularly encounter: Sites with difficult access, cold climate, forest, icing, very challenging topography and many more.

PHOTOVOLTAIC

New Energy Scout plans photovoltaic plants of various sizes and capacities. Additionally, we offer a so-called quick check:

We analyse the potential and cost of your plant – you obtain decisive information on the profitability of your project.

Our service range:

- Feasibility studies
- Project management, supervision of tenders
- Rooftop renting agreements
- Approval procedure
- Analysis of solar potential
- Solar land register
- Studies

BIOGAS

New Energy Scout has been active in biogas for many years, both in Switzerland and abroad. Together with a partner companies, we can provide various support, e.g. when planning your own biogas plant.

Our service range:

- Feasibility and planning
- Consulting
- Project evaluation
- Profitability and scenarios
- Studies
